Making the Most of Your Massage

How to Prolong the Benefits of Bodywork

Barbara Hey

A massage works in wonderful ways, easing stress and pain, calming the nervous system, increasing circulation, loosening tight muscles, stimulating internal organs, and enhancing skin. The multiplicity of physiological responses sends a simple, clear message to the mind: Massage feels good. Of course, you want to hold on to that just-had-a-massage feeling -- total body relaxation, muscles relaxed and at ease, and fluid movement restored -- for as long as possible.

But how long that bliss lasts depends on the state of your body. If you're suffering from chronic pain or recovering from injury, then it may take more sessions and perhaps different

Massage Frequency

How often you receive massage depends on why you're seeking massage. In dealing with the general tension of everyday commutes, computer work, and time demands, a monthly massage may be enough to sustain you. On the other hand, if you're seeking massage for chronic pain, you may need regular treatments every week or two. Or if you're addressing an acute injury or dealing with high levels of stress, you may need more frequent sessions. Your situation will dictate the optimum time between treatments, and your practitioner will work with you to determine the best course of action.

*You cannot
perceive beauty
but with a
serene mind.*

-Henry Thoreau

The more often you receive massage, the more therapeutic it becomes.

modalities before optimal health is restored.

If massage is part of your regular health regimen, then it's more likely the effects will endure. In other words, the effects of massage are cumulative, like any healthy habit. The more often you get a massage, the greater and longer-lasting the benefits.

"You need to consider how you felt before the session and how you felt after, and then look at how long you maintain that," says Pieter Sommen, the chair of the eastern department in the Swedish Institute School of Massage Therapy in New York.

In general, experts say "regular" is preferable, but how regular depends on your situation. While daily massage would be delightful, practical considerations such as cost, time, and physical need likely determine the frequency of treatments. "It's best to maintain a schedule," says Eeris Kallil, CMT, a shiatsu instructor at the Boulder College of Massage Therapy in Colorado. "That way the body becomes conditioned and prepared for session at specific intervals."

Maintenance

Whether you get a massage weekly, monthly, or just every once in a while, the following habits can maximize and extend the afterglow of treatment.

WATER

One bit of advice you'll hear over and over again is to drink plenty of water after a massage. Bodywork -- no matter the particular modality -- releases toxins, such as lactic acid and carbonic acid, that need to be flushed from the body. Massage also promotes circulation, increasing blood flow and oxygen and stimulating the lymphatic system, which helps rid the body of pathogens. After-massage hydration supports these functions, helping to eliminate released impurities, sooner rather than later.

STRETCHING

Another helpful habit is stretching between massages to maintain joint mobility, prevent muscles from tightening up again, and keeping the life energy flowing. This may mean doing yoga or whatever specific or full-body stretches suggested by your practitioner. After a shiatsu session, for example, your practitioner may recommend "makko-ho" stretches, a series of six exercises designed to keep energy circulating. "This series of stretches take anywhere from 5 to 10 minutes a day, but really help keep the chi flowing through the body," says Kallil.

EXERCISE

Working out can also help maintain the benefits of massage, and this habit should be continually cultivated. However, if you're receiving massage therapy to help speed muscle strain recovery, you may need to ease up on

the exercise for a while and give the body time to heal -- particularly if you're recovering from a strenuous body-pummeling training regimen. "You don't want to over-work your body," says Kallil. That is, if running is taking a toll, try something more gentle and meditative such as swimming, walking, or tai chi.

BODY AWARENESS

After a massage, respect how your body feels. If your body seems to ask for rest, give in to that demand. This may mean backing off the to-do list, taking it easy, moving slower, and perhaps doing less for a while. And don't allow yourself to get fatigued because it will undermine the effects of massage. Get sufficient sleep to allow the body to absorb the effects and regain vitality.

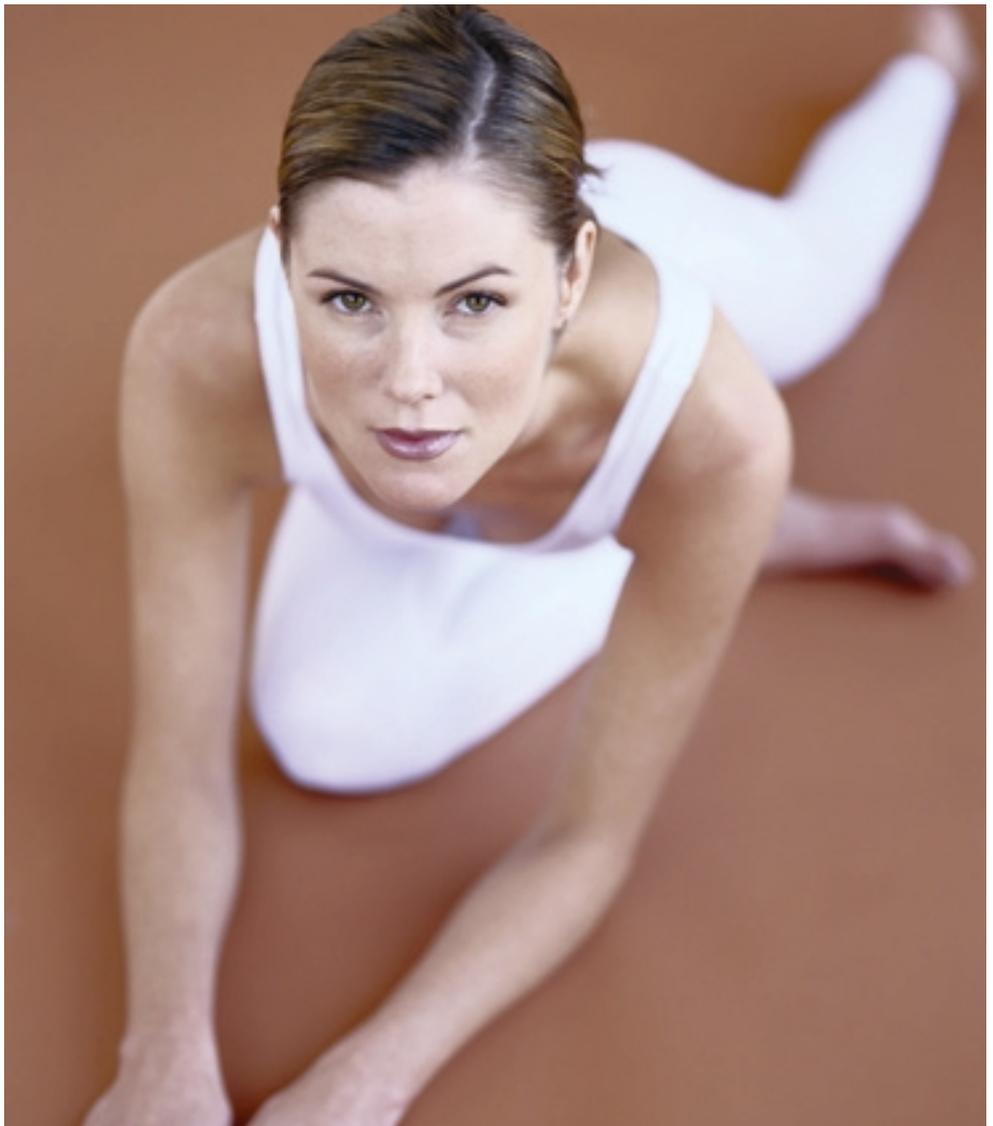

DIET

Finally, since you've just rid the body of

toxins, support the body's renewed state by adhering to a healthy diet rich in fruits and vegetables, which will continue the detoxification process. Lay off the espresso and all adrenaline-challenges for a time -- which would short-circuit relaxation anyway -- and enjoy the calm.

The benefits of massage are many, including: increasing circulation, allowing the body to pump more oxygen and nutrients throughout the body; stimulating lymph flow and boosting immunity; relaxing overused or tight muscles; increasing joint mobility and range of motion; reducing recovery time after strenuous workouts or surgery; and relieving back pain and migraines, just to name a few.

By opting for a few lifestyle choices, you can extend these benefits and get the most out of your massage.

Stretching between massages helps maintain relaxed muscles, joint mobility, and energy flow.

De-stressing the Commute

Turning Road Rage into Road Sage

The average American commuter spends an hour a day driving to and from work. During this stressful, stop-and-go time, it's likely that blood pressure increases, adrenaline begins pumping, and muscles constrict and tighten. By the time you get home, you're wiped out and grumpy, and you have less to offer to those you come home to. If this sounds familiar, recognize that you have the power to reduce commuter stress. Here are a few tips to make your commuter time contribute to -- rather than detract from -- your life.

- Employ adjustable back cushions, pillows, wedges, and lumbar supports for a more comfortable commute. For more information, check out www.relaxtheback.com.

- To successfully sidestep the late-afternoon slump often caused by the stress hormone cortisol, keep some healthy snacks within arms reach. Celery, string cheese, water, and nuts -- especially almonds -- are good options for the drive home.

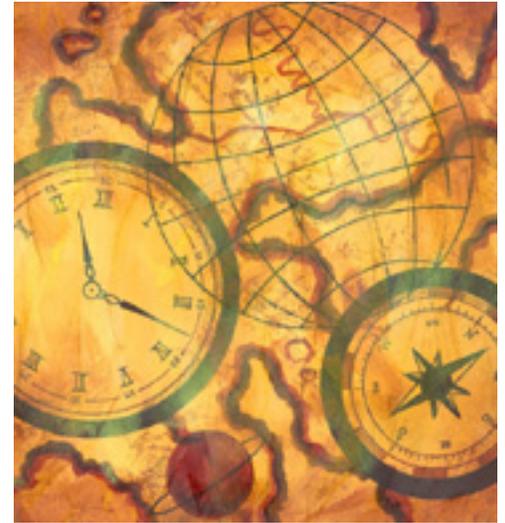

- Borrow books-on-tape/CD from the library. Consider purely entertaining novels to ease the intensity of your drive.

- Learn a foreign language. Libraries also loan out these types of tapes and CD, too.

- Use your commute as an opportunity for spiritual or emotional growth. When stressing about a traffic jam, remind yourself that it's completely out of your control. Remember, attitude is everything.

- Practice breathing. When stress occurs, breathing becomes shallow and constricted. Taking full, deep breaths gives the body more oxygen, helping to regulate physical and mental function. Exhaling fully releases tension and built up toxins.

For more ideas on achieving calm in a busy world, consider reading *Serenity to Go: Calming Techniques for Your Hectic Life* (New Harbinger Publications, 2001) by Mina Hamilton.

Creativity goes a long way on your commute.

High Time for Tea

Discover the Healing Properties of Taking Tea

The health research is enough to make you forego the latte for strong brewed tea instead. Name your color -- black, white, green, even red -- teas are packed with disease-preventing antioxidants (more than some fruits and vegetables) and contain vitamins, minerals, and at least half the caffeine of coffee.

Fortified with free radical-fighting polyphenols, tea drinkers have a reduced risk of many different cancers, in particular stomach, colorectal, and even skin cancer. Tea drinkers also have a lower risk of heart disease, stroke, and high cholesterol. Containing anti-inflammatory and arthritis-preventing properties, tea also helps stimulate the immune system and protect the liver against toxins.

But you have to drink up. Most research points to five or so cups of brewed tea each day to reap the health benefits. Decaf tea loses some but not much of its health punch, due to extra processing.

All traditional tea -- white, green, oolong, and black -- is derived from the leaves of an evergreen tree called the *Camellia sinensis*, and all contain the health-promoting polyphenols. White tea is made from young tea leaves, dried in the sun without fermentation or processing. Green tea is dried with hot air after picking, so it retains its color but is not fermented. Oolong tea, sometimes referred to as "brown" tea, is fermented but not processed to the point of black tea. Black tea, on the other hand, is fully fermented, which

accounts for the color of the leaves and its stronger flavor.

Rooibos, or red tea, is naturally caffeine-free and from the *Aspalathus linearis*, a shrub that grows only at high altitude near Cape of Good Hope in South Africa.

Herbal teas are made from a variety of plants, roots, bark, seeds, and flowers and are technically herbal infusions rather than tea. Though they don't contain the same antioxidants and haven't received the same research-based accolades as traditional tea, the herbs in these infusions have certain healing properties that have been used for centuries to treat many common health issues.

*The time to relax
is when you
don't have time
for it.*

-Sydney Harris

"When was the last time you spent a quiet moment just doing nothing-just sitting and looking at the sea, or watching the wind blowing the tree limbs, or waves rippling on a pond, a flickering candle, or children playing in a park?" Ralph Marston

Do these words make you stop and think? We live very busy lives. We constantly have demands made on our time and energy. The idea of taking time for simple pleasures often seems to "take too much time". Stress is a major factor in health problems today.

At Quiet Moments clients are encouraged to make time for themselves. We must keep the body, mind and spirit healthy, as they are all connected.

Meg suggests the Relaxation Therapy Sampler. This is a 60 minute session consisting of the following:

20 Minutes of energy work-reiki and attunement

20 minutes reflexology

20 minutes back massage

Mention this newsletter and take \$5.00 off the price of the Relaxation Therapy Sampler. This offer will expire December 1, 2005.
