## A Cornerstone of Health

### Why Now, More Than Ever, You Need a Massage

While you may be tempted to trim your wellness budget when economic times are tough, now more than ever, massage should play a role in reducing stress and strengthening the health of Americans.

When you feel your best, you are more likely to be able to face the challenges difficult times present. With greater health and peace of mind, you can face difficulties with poise, clarity of purpose, and strengthened emotional reserves.

Truly, massage is more than a luxury--it's a vital part of self-care that has a positive ripple effect on us as we work, play, relax, live life, and care for others.

reducing the risk of stress-related illnesses, massage also boosts immunity, helping you fight colds, flu, and other viral infections.

Following is a sampling of a long list of bodywork benefits:

- EASE ANXIETY.
- REDUCE THE FLOW OF STRESS HORMONES.
- IMPROVE SLEEP.
- BOOST THE IMMUNE SYSTEM.
- BUILD ENERGY LEVELS.
- REDUCE FATIGUE.
- FOSTER CONCENTRATION.
- INCREASE CIRCULATION.
- DEVELOP SELF-ESTEEM.
- REDUCE FREQUENCY OF HEADACHES.
- RELEASE ENDORPHINS.

*Trust your hopes, not your fears.*

-David Mahoney

Massage induces a sense of grounding and calm, helping you face challenges with ease.

### Invest In Yourself, Invest in Those You Love

In economically challenging times, it is vital to invest in preventative health care. The last thing you want is to get sick, have to take time off of work, and pay expensive medical bills. Staying healthy means maintaining your ability to take whatever life has to throw at you. Besides lowering stress levels and, in turn,

And if you think about it, massage is an excellent value. The price of massage has remained stable in recent years, as the cost of movies, dining out, and sports events has risen. Which of these has the power to improve your health and your outlook on life?

### Continued from page 1

The positive effects of regular massage can have far-reaching effects in many areas of your life.

### At Home

Massage therapy will also help families under stress create healthier households with clear-thinking and more relaxed moms and dads. Children are very sensitive and often pick up on tension in a household; parents who are taking care of themselves are more likely to be better caregivers and provide a sense of security to their kids. This goes for caregivers of aging parents and other family members.

### At Work

The health benefits of massage can help forestall illnesses and lost work time, especially when you may be asked to produce more with fewer resources. Decision-making skills will be better and your performance is likely to be improved with a clear focus and more energy.

A hint for the boss: Research shows employees exhibit less stress and improved performance when given twice-weekly, 15-minute massages in the office!

### For Health Conditions

Those with already existing health conditions can continue to reap benefits in the following ways. And proactively caring for health through massage may help reduce costly doctor visits and use of prescription and over-the-counter medications.

Research shows:

- Massage can reduce sports-related soreness and improve circulation--good to know when you may be exercising more to reduce stress.

- Deep-tissue massage is effective in treating back pain, arthritis, osteoarthritis and fibromyalgia. Fibromyalgia patients receiving massage also have less pain, depression, anxiety, stiffness, fatigue, and sleep problems.

- Massage reduces symptoms of carpal tunnel syndrome.

- Oncology patients show less pain, fatigue, nausea, anxiety and depression following massage therapy.

- Stroke patients show less anxiety and lower blood pressure with massage therapy.

- Massage therapy is effective in reducing postsurgical pain.

- Alzheimer's patients exhibit reduced pacing, irritability and restlessness after neck and shoulder massage.

- Labor pain. Massage during labor appears to reduce stress and anxiety, relax muscles and help block pain. Some medical professionals believe massage also reduces tearing, shortens labor, reduces the need for medication and shortens hospital stays.

- Preterm babies receiving massage therapy gain more weight and have shorter hospital stays than infants not receiving massage.

- Massage is beneficial in reducing symptoms associated with arthritis, asthma, burns, high blood pressure, and premenstrual syndrome.

There is now a body of research to support the benefits listed above. But there's no greater testimonial than the person who is a regular receiver of massage. The first-hand experience of bodywork clients largely echo the same sentiment: bodywork enhances quality of life, and the return on your investment is great.

While bodywork feels like a luxurious mini-vacation, and you should by all means enjoy it, there is an actual physical need for massage. Maintaining a regular massage schedule will help you operate at your peak level--whether it be at work, at home, or at play. Invest in yourself, and book a massage today.

Massage is one of the few things that provide so much pleasure while improving your health.

# Are Your Candles Safe?

## How to Choose Toxin-free Flames

*Glynnis Osher*

There is nothing like the inviting glow of a candle to make us feel relaxed, guide us into a meditative state, or harmonize the ambiance of a room. With all these life-enhancing attributes, it is troubling to think that many candles are toxic and doing more harm than good--but that may be the case.

### The Problem

Most candles today are made from paraffin wax, a petroleum by-product that emits toxic fumes and soot into the air. There are up to eleven known carcinogenic compounds in paraffin candles that are considered toxic air agents by the state of California. Burning these candles can cause harm to the heart, lungs, circulatory, and nervous systems, especially a concern for young children, the elderly, and those with asthma or other already established respiratory problems. In addition, the burning of the fragrant oils in scented candles can create significant air pollution, as well.

Another possible hazard: wicks. While

U.S. candle makers voluntarily agreed 25 years ago to prohibit lead wicks, some imported candles may still contain lead. Ensure you're burning cotton wicks only.

### The Solution

The good news is, you can still enjoy burning candles because there are safe and healthy alternatives. Conscious candle choices include beeswax and the increasingly popular soy wax. Unlike petroleum, soy is a sustainable and renewable resource. Soy wax is a vegetable by-product that is biodegradable and nontoxic. Many candle enthusiasts prefer soy candles because they burn clean and release very little or no soot into the air. Also, because soy wax is water soluble, clean up is easy and containers can be easily washed and reused. Another benefit of soy wax is the cooler burning temperature, making for a much longer burning candle.

**Candles are for relaxation, not toxification.**

# Yogurt, the Super Food

## Balance Digestion, Improve Immunity, and Prevent Disease

In some form, yogurt has existed since at least 2000 BCE, and many food historians believe it predates recorded history, possibly going back as far as 9000 BCE. Why such staying power? A bit of a wonder food, yogurt improves digestion, which can boost immunity and even help prevent colon cancer. One dairy product even most lactose intolerant people can eat, yogurt is loaded with active bacterial cultures, the key ingredients that make it so healthy.

While we typically think of bacteria as dangerous bugs that cause disease and infection, the body is host to billions of bacteria that live in the intestines and help digest the foods we eat. These good bacteria, or microflora, actually fight off the bad bacteria that cause illness.

Some of these same good bacterial species are used to ferment milk, and it's these cultures that give yogurt its texture and tart flavor. They also process much of the milk sugar, called lactose, during fermentation, which is why yogurt usually doesn't bother people with lactose intolerance.

Eating yogurt helps maintain the microflora in the gut, optimizing digestion and keeping harmful bacteria in check. Ever noticed how a course of antibiotics is often followed by a bout of diarrhea? This is because antibiotics kill off all the bacteria in the gut--the bad stuff and the good--leaving the gastrointestinal tract compromised. Fortunately, yogurt can help counteract this imbalance.

Furthermore, this food is a good source of nutrients, including B vitamins, calcium, magnesium, and phosphorus. Whole milk yogurt also contains conjugated linoleic acid (CLA), an essential fatty acid with cancer fighting properties, especially beneficial in preventing breast and colon cancers. And CLA has been shown to increase fat metabolism, helping the body convert fat to lean muscle.

Maintaining the good bacteria in the gastrointestinal tract is key to healthy digestion, and eating quality yogurt is a great way to do this. Be sure to read the labels and choose varieties that contain live active cultures to ensure you're getting the most from your yogurt.

*See the world as  
if for the first  
time, see it  
through the eyes  
of a child, and  
you will  
suddenly find  
that you are  
free.*

-Depak Chopra

Quiet Moments Massage Therapy has a new addition to its website. Visit [www.quietmomentsmassagetherapy.com](http://www.quietmomentsmassagetherapy.com) and click on Meg's picks. You will find a selection of books that offer helpful information on posture, tai chi exercises, and meditation.

There is also a selection of cds that will allow the individual to enjoy relaxing music at home. Music has many benefits. It can be uplifting and help one to focus their attention or in the case of massage, help to lower blood pressure and heart rate, as much of the music is composed at 50 to 60 beats per minute. Just click on the selection and it will take you to the Amazon website where you can listen to a sample of the cd. They also offer other music suggestions.

Massage is a wonderful tool to help one relax and de-stress, but managing stress is like baking a cake; it takes many ingredients and utensils to create one. These selections on Meg's Picks are just additional tools for you to fight stress. You can't always control outside circumstances that can create stress, but you can control how you manage them.
